

Sahil Ghag

Software Engineer | Backend Developer | Python Developer

☎ +91-7208678132 ✉ ghagsahil21@gmail.com 🔗 linkedin.com/in/sahil-ghag 🐙 github.com/Sahilghagg

SUMMARY

Final-year Information Technology student with hands-on experience in Software Engineering, Backend Development, and Full-Stack Web Development. Skilled in Python, Node.js, FastAPI, Flask, SQL, MySQL, MongoDB, and RESTful API development. Experienced in designing scalable applications, database-driven systems, authentication workflows, and machine learning solutions. Strong foundation in Data Structures, Algorithms, OOP, DBMS, Operating Systems, and Computer Networks.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C++, SQL

Frontend: React.js, HTML5, CSS3, Bootstrap

Backend: Flask, FastAPI, Django, Node.js, REST APIs, JWT Authentication

Databases: MySQL, MongoDB, PostgreSQL

Tools: Git, GitHub, Docker, Postman, Vercel

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS

Placed 2nd in DSW Hackathon among multiple competing teams | Solved 200+ DSA problems on LeetCode and GeeksforGeeks | Event Head for College Sports Activities

EXPERIENCE

Junior Software Developer Intern

Jun 2025 – Aug 2025

Bellaluna Gaming Studio Pvt. Ltd

Mumbai

- Engineered scalable backend modules using Python and REST APIs to support application functionality and data processing workflows.
- Integrated MongoDB and MySQL databases for efficient storage, retrieval, and management of application data.
- Collaborated using Git and GitHub within Agile development workflows and contributed to feature implementation and testing.
- Programmed and tested game features using GDScript and Android Studio, ensuring smooth user experience and functionality.

PROJECTS

Enerchain – Energy Trading Platform

Jan 2026 – Present

React.js, Node.js, REST APIs, Blockchain
GitHub

- Designed and built a peer-to-peer energy trading platform enabling secure and transparent energy transactions.
- Built RESTful APIs and scalable backend architecture to handle transaction processing and user management.
- Exploring blockchain integration to enhance transaction transparency and decentralization.

Car Rental Management System

Jan 2025 – Mar 2025

React.js, Node.js, MongoDB
Live Demo | GitHub

- Created a full-stack vehicle rental application with secure authentication and role-based access control.
- Optimized MongoDB queries, reducing response time from 800ms to 120ms and improving application performance.
- Deployed the application using Vercel and implemented production-ready testing workflows.

Document Forgery Detection System

Aug 2024 – Nov 2024

Python, OpenCV, PyTorch, Machine Learning
GitHub

- Constructed a machine learning-based signature verification system achieving 86% accuracy.
- Applied image preprocessing, feature extraction, and classification techniques using OpenCV and PyTorch.
- Implemented an automated forgery detection pipeline for signature authenticity verification.

CERTIFICATIONS

- Oracle Certified Java Programmer (2023)
- C++ Certified Associate Programmer (2023)
- AWS Certified Cloud Practitioner – Amazon Web Services (2024)
- AWS Academy Data Engineering – Amazon Web Services (2024)
- Zscaler Zero Trust Cloud Security Certification – Zscaler (2025)

EDUCATION

Bachelor of Engineering in Information Technology

2022 – 2026

A. P. Shah Institute of Technology, Mumbai University

CGPA: 8.15 / 10
